career objective

Career Objective
To contribute to a growing organization by applying technical, creative, and communication skills while developing real-world experience.

Projects

Agro Nova – Smart Farming Dashboard
Web Application Project
Developed a responsive smart farming dashboard using HTML, CSS, JavaScript, and React.js. Designed a modern and user-friendly UI with modules for weather tracking, pest detection, soil analysis, and market updates. Improved accessibility and created visually consistent layouts focused on real-time farm insights.

Certificates

Enterprise Design Thinking Practitioner
"Completed IBM's Enterprise Design Thinking Practitioner Program."

Second Place – Technical Project Expo (ExpoZYa Tech)
"Secured 2nd place for presenting an innovative technical project."

Interests

Web Development
Front-end development and interactive UI creation.

UI/UX Design
Designing clean, user-friendly interfaces.

Cybersecurity Basics
Exploring ethical hacking and system security fundamentals.

Photography
Capturing creative and tech-themed visuals.

Social Media
Content creation and engagement optimization.
